HOAC[®]
Stage Technology

HOAC® Stage Decks.

Discover the new flexibility for your stage.

HOAC® Stage Decks are designed to build your staging area in the most flexible way. Column Heights go up to 5 m, deck sizes start from 1m x 1 m up to 1,5 x 1,5 m. 1000 mm telescopic range allow you to set up single decks or rows or areas in different heights. The systems allows to lift up frames at any stage area without dismantling the whole row or stage. Our new patented Link block backloaded gives you the freedom to open your stage wherever it is needed.

Stage Deck Frame

HOAC® Stage Deck frame

The basic element of the modular system is offered in many different sizes. We use our unique and intelligent connection to lock the frames together with inner tension - without using tools.

Stage Deck Column

HOAC® Stage Deck Column is special designed to assure the stable and tight stage underconstruction up to 5m on one hand and to manage each frame as a single frame. The telescopic range goes up to 1m.

Link Block Preloaded

HOAC® Link Block Backloaded gives you the opportunity to connect the frames tight without tools but open a single or multiple frames at any position on your stage for different setup's or to just open the stage on a few positions to build in stairs, lifts or others.
